

Adding Animations to Project 1: Volcanoes

1. **ANIMATIONS** are how slide content moves in. PowerPoint 2019 has 4 types: Entrance, Emphasis, Exit, and Motion Paths.

2. DO NOT add ANIMATION to the FIRST SLIDE.

3. Preview animations and CHOOSE ONE for your slideshow.

4. DO NOT use any animation on SLIDE TITLES or GRAPHICS. WE WILL JUST USE ON THE BULLETED TEXT

5. SELECT THE TEXT PLACEHOLDER ON SLIDE 2 and SELECT AN ENTRANCE ANIMATION.

6. Then CLICK THE PULL-DOWN ARROW for EFFECT OPTIONS. SELECT BY PARAGRAPH AS SHOWN RIGHT.

7. You can speed up or slow down the transition with the DURATION setting.

8. Leave START: ON CLICK. Experiment with DURATION if you like. DO NOT USE DELAY IN THIS PROJECT.

9. When you like how your bullet points animate, SAVE YOUR WORK and GO TO THE NEXT SLIDE.

10. EXPERIMENT WITH MOVING TEXT IN FROM DIFFERENT DIRECTIONS.

11. REPEAT THIS PROCESS FOR SLIDES 3-12

12. PREVIEW YOUR SLIDESHOW. It now has TRANSITIONS and ANIMATIONS.
