

## **Three Point Lighting Basics for Photography or Video (3:48) <https://tinyurl.com/2s3favka>**

1. What is 1 area where studio lighting can be used? (Hint: Video suggests 3):
2. What is the standard lighting method used in visual media including video, film, and photography?
3. What is the key light?
4. No subject in a video or photo should be "dead center" or in the exact middle of frame. What is the "broad side"?
5. Where does this video suggest putting the key light?
6. What is the fill light?
7. What is the back light (also called rim light?)
8. If the back light is off to the side and casts some light on the front/side of subject, what is it called?
